## **FORMER HIGH-LEVEL DARPA OFFICIALS JOIN THE LIVINGSTON GROUP AS STRATEGIC PARTNERS**

***For Immediate Release***  
**September 23, 2009**

**Washington, DC** – The Livingston Group (TLG), a bipartisan government and public affairs company, welcomes Dr. Anthony “Tony” Tether and Dr. Arthur “Art” Bruckheim as strategic advisors to the firm. Both men bring distinguished careers in the area of defense, technology research and procurement. Dr. Tether served as the Director of the Defense Advanced Research Projects Agency (DARPA) and Dr. Bruckheim as a technical advisor and key consultant to the DARPA Director.

“Both Dr. Tether and Dr. Bruckheim are greatly respected by the defense community as leaders in the field of military and project research,” said TLG Founder Bob Livingston. “Their work and vision has aided our nation in preserving its technological superiority. Our clients will benefit from their knowledge and expertise and we are honored to have their counsel.”

DARPA is the Department of Defense’s premiere agency for the research, development, and demonstrations of concepts, devices, and systems that provide highly advanced new technologies and capabilities.

As Director of DARPA, Dr. Tether was responsible for management of the agency’s projects for high-payoff, innovative research and development. Prior to his appointment to lead DARPA, he served as Chief Executive Officer for Dynamics Technology Inc. and was Vice President of Science Applications International Corporation’s (SAIC) Advanced Technology Sector and was Chief Executive Officer and President of The Sequoia Group, a firm that provided program management and strategy development services to the government and industry. Dr. Tether has served also in the position of Director of National Intelligence in the Office of the Secretary of Defense. In 2009, Secretary of Defense Robert Gates honored him with the Department of Defense Outstanding Public Service Medal.

As a Program Manager at DARPA, Dr. Bruckheim was responsible for managing radar technology and anti-submarine warfare research, and led studies in manufacturing technology for military applications, urban warfare and airport security. During his more than 30 years of experience, he focused primarily on signal and data processing with applications to sonar, radar and infrared sensors. Dr. Bruckheim also held a leadership position at SAIC as Vice President responsible for law enforcement programs where he helped coordinate an international project with the government of Argentina in non-intrusive cargo inspection.

The Livingston Group, LLC, was created in March 1999 and provides comprehensive public affairs and government relations services on a global basis. A complete overview of the firm’s practices, personnel, representative client list and results, is available at [www.livingstongroupdc.com](http://www.livingstongroupdc.com).
